EDUCATION

G.L.A University

B.Tech in Computer Science and Engineering, CGPA: 7.05

Mathura, UP

Aug 2024 – May 2028

Shemford Futuristic K12 School

Intermediate, Percentage: 76%

Auraiya, UP

2024

CERTIFICATIONS

AWS Academy Graduate – Cloud Foundations

Mar 2026

Amazon Web Services Training and Certification

- Earned the AWS Academy Cloud Foundations Training Badge issued by Amazon Web Services on Credly
- Completed AWS Academy Cloud Foundations; hands-on with EC2, S3, IAM, Lambda, CloudFormation, and CloudFront – covering serverless computing, infrastructure-as-code, CDN configuration, and security on AWS
- Gained foundational knowledge in AWS Core Services, AWS Cloud infrastructure, AWS Pricing models, and AWS Support plans
- Developed practical understanding of cloud computing fundamentals including compute, storage, networking, and security on AWS

PROJECTS

FinTwin | Python, FastAPI, Flask, PostgreSQL, React, Docker, Redis, Nginx

Feb 2026 – Present

- Built a microservices-based financial digital twin system with 5 independent FastAPI services (Account, Transaction, Twin Engine, Risk Analysis, Notification) routed via an Nginx API gateway
- Engineered a stateless Digital Twin Engine that fetches live account data and runs “what-if” simulations (withdrawal, deposit, rate change) computing risk scores without touching real records
- Implemented JWT authentication, Redis caching for balance reads, and a dynamic risk-scoring engine that flags high-risk transactions based on spend patterns and balance thresholds
- Containerized all services with Docker Compose; designed inter-service REST communication with a Kafka-based event-driven architecture; deployment-ready for AWS EKS with CloudFormation templates for infrastructure provisioning

Polygon Game | HTML, CSS, JavaScript, WebRTC, Node.js

Mar 2026

- Developed a real-time multiplayer browser-based polygon shooting game using HTML5 Canvas and vanilla JavaScript with peer-to-peer WebRTC communication
- Built a Node.js signaling server to handle room creation, matchmaking, and WebRTC offer/answer exchange between players
- Integrated TURN server credentials to ensure reliable peer connections across NAT/firewall environments
- Deployed the signaling server on Render with a `render.yaml` config for continuous deployment

COMPETITIVE PROGRAMMING

LeetCode | Shiva Dixit

Solved problems across Easy, Medium, and Hard categories; focusing on DSA problem solving

TECHNICAL SKILLS

Languages: Python, Java, C, SQL, Bash, HTML

Backend & Systems: REST API Design, Microservices, FastAPI, Flask, Nginx

Infrastructure & DevOps: Docker, Kubernetes, Linux (Ubuntu), Git, Bash Scripting

Cloud Platforms: AWS (EC2, S3, IAM), GCP

Databases: PostgreSQL, MySQL, SQL (query optimization, schema design)
